## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

1. Claims 1, 5, 8, 9, 11 are rejected under 35 U.S.C. 102(b) as being anticipated by Goldberg et al. (3,771,065)
2. Regarding Claim 1, Goldberg et al. discloses: optical feedback means defining a resonator for said laser light, the feedback means comprising at least one substantially solid cholesteric layer having a substantially planar texture exhibiting selective reflection of light defined by a reflection band tuned to said predetermined wavelength range (Figure 1, Col 1, Lines 55-68, Col 2, Lines 1-9); said cholesteric layer being obtained from reactive cholesteric mixtures selected from mixtures comprising: at least one cholesteric, polymerizable monomer (Figure 1, Col 2, Lines 1-9, 38-67).
3. Regarding claim 11, Goldberg et al. disclose: active species is a laser dye (Col 3, Lines 3-9).

***Allowable Subject Matter***

4. Claims 3-10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Conclusion***

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Goldberg et al. discloses liquid lasing medium having internal distributed feedback comprising cholesteric liquid crystal and fluorescent dye. Fan et al. discloses a solid state dye laser with CLC and dye as the active material.
